

Circular Economy Approach for B.C.

CleanBC
Roadmap to 2030

The Need for a Circular Economy Approach

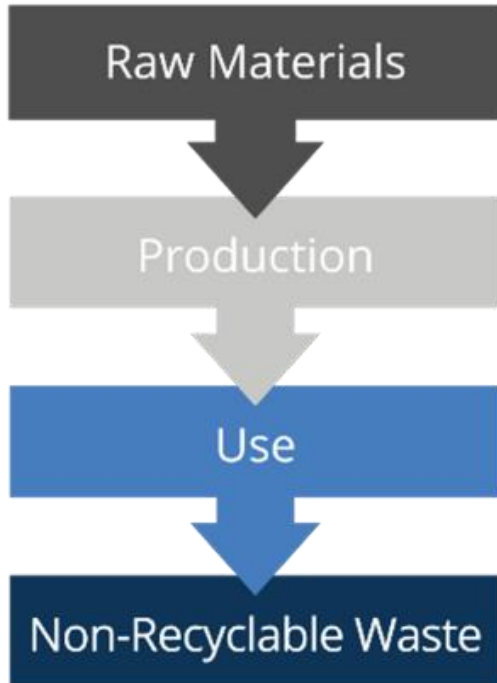

The CleanBC Roadmap to 2030 aims to put B.C. on the path to net-zero emissions by 2050.

- The Roadmap outlines the need for a Circular Economy approach to support our climate goals and our economy.
- The Climate Action Secretariat and Environmental Protection Division are working together to document the circular economy transition taking place in B.C.

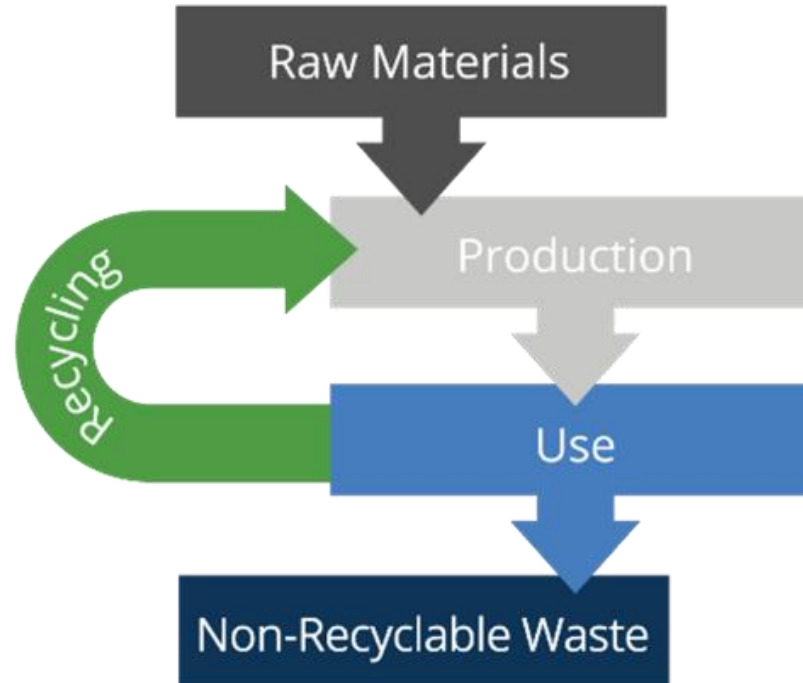

THE EVOLUTION TOWARD A CIRCULAR ECONOMY

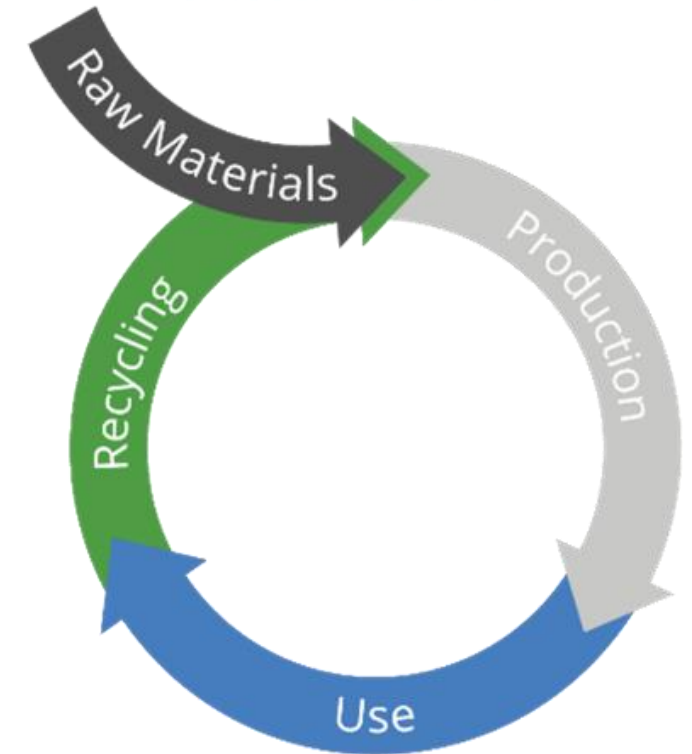

LINEAR ECONOMY

RECYCLE ECONOMY

CIRCULAR ECONOMY

Vision

A future where B.C.'s economy embraces the principles of circularity, waste prevention and resource efficiency to support a clean growth economy that reduces emissions and that is fair, inclusive, and people-centered.

Guiding Principles

- Design out waste from products and services.
- Use resources at their highest economic and environmental value for as long as possible.
- Ensure greenhouse gas reduction, environmental protection, and land regeneration.
- Enable inclusive innovation and market transformation through B.C. and its economy.
- Advance true, lasting, and meaningful reconciliation with Indigenous Peoples by promoting connection, development, access and improvement, and full participation in all aspects of B.C.'s economy.
